

SolidComp's Products & Services

COORDINATE SYSTEM MEASUREMENT

We create, update, verify and document production facility coordinate systems, ensuring that measurement and 3D data remain precisely positioned for decades.

Our services also include correcting incomplete documentation and markings to maintain accuracy and consistency over time.

Your Trusted Partner

SolidComp is a full-service provider of high-quality 3D scanning solutions for industrial needs across the Nordic countries, and through our partner network, worldwide.

Our flagship product, Reality Twin™, is an exceptionally visual and precise digital twin, delivering an accurate virtual replica of industrial environments. We offer solutions for production plants, engineering firms and equipment manufacturers, enabling them to work more efficiently, safely, and with greater confidence.

ESTABLISH LONG-TERM DATA PRECISION

Ensure accurate positioning of measurement and 3D data for decades, and reliable foundation for all future projects.

PREVENT DESIGN CONFLICTS

Seamless integration of design materials into the coordinate system allows for early detection and prevention of clashes.

ACHIEVE COST EFFICIENCY

significant cost savings over time by enhancing accuracy in design and construction phases.

BUILD A ROBUST DIGITAL TWIN FOUNDATION

solid coordinate framework lays the groundwork for a continuously updated factory model and digital twin.
