# REALITY TWIN™

## Gaussian Visuals

Gaussian Visuals is a cutting-edge 3D rendering technique to create ultra-realistic large-scale 3D models, ideal for communication and collaboration.

Access absolute visual fidelity, enhanced with Gaussian splatting, in your Reality Twin environment with a click of a button.

## Your Trusted Partner

SolidComp is a full-service provider of high-quality 3D scanning solutions for industrial needs across the Nordic countries, and through our partner network, worldwide.

Our flagship product, Reality Twin™, is an exceptionally visual and precise digital twin, delivering an accurate virtual replica of industrial environments. We offer solutions for production plants, engineering firms and equipment manufacturers, enabling them to work more efficiently, safely, and with greater confidence.

### PHOTOREALISTIC

Millions of Gaussian “splats” deliver colour-accurate depth and shading with unmatched precision.

### EXTREME DETAIL

2 cm accuracy with textures and fine structures up to 30% sharper than standard mapping.

### FAST CAPTURE & UPDATE

Mobile LiDAR enables a full factory scan in days, with the possibility for weekly refreshes.

### FAST SETUP

From scan to fully functional model in record time, with minimal disruption.

*Request a demo and discuss with us how Reality Twin and Gaussian Visuals can elevate your business.*
