

Innovator in 3D Industrial Environments

SOLIDCOMP

Solving the Challenges Industrial Companies Face Every Day.

SolidComp is a Finland-based, internationally operating provider of software and 3D scanning solutions, specialising in industrial digitalisation.

Our mission is to empower industrial operators, engineers, OEMs and project managers with tools that enhance planning, safety, maintenance and digital resilience across the supply chain.

Your Trusted Partner

SolidComp is a full-service provider of high-quality 3D scanning solutions for industrial needs across the Nordic countries, and through our partner network, worldwide.

Our flagship product, Reality Twin™, is an exceptionally visual and precise digital twin, delivering an accurate virtual replica of industrial environments. We offer solutions for production plants, engineering firms and equipment manufacturers, enabling them to work more efficiently, safely, and with greater confidence.

REALITY TWIN

Your best 3D virtual copy of your industrial environment. A complete solution that can be set up for use as fast as in two weeks.

Use the near-photographic Gaussian Visuals interface in Reality Twin.

3D SCANNING FOR INDUSTRIAL ENVIRONMENTS

The most precise and visually advanced 3D scanning on the market. We utilise a comprehensive range of cutting-edge scanning methods.

POST PROCESSING AND CUSTOMISED SERVICES

Modern and scalable solutions tailored to a wide range of industrial needs.
