

SolidComp's Products & Services

# LASER SCANNING

**We capture indoor and outdoor environments as highly accurate 3D models, delivering cost-efficient solutions.**

Our state-of-the-art technology and industry-leading expertise ensure that you receive precise and comprehensive 3D models quickly and seamlessly. By integrating high-quality 360° imagery, we provide an enhanced visual and analytical experience for your projects.

**Put your data to work and reduce design costs and site visits by 5–10%**

## Your Trusted Partner

SolidComp is a full-service provider of high-quality 3D scanning solutions for industrial needs across the Nordic countries, and through our partner network, worldwide.

Our flagship product, Reality Twin™, is an exceptionally visual and precise digital twin, delivering an accurate virtual replica of industrial environments. We offer solutions for production plants, engineering firms and equipment manufacturers, enabling them to work more efficiently, safely, and with greater confidence.

### **COST-EFFECTIVE PRECISION**

Highly accurate 3D models of any indoor or outdoor environment at a competitive cost.

### **RAPID DATA ACQUISITION**

Capture up to million data points per second, ensuring swift and efficient measurements.

### **COMPREHENSIVE FACILITY COVERAGE**

Scan entire facilities within a single day, achieving a point density of 5–10 mm.

### **SEAMLESS SOFTWARE COMPATIBILITY**

Smooth integration with leading design software platforms, facilitating streamlined workflows.

### **CUSTOMISED DELIVERABLES**

3D models and 2D images tailored to your specific format requirements.
