

SolidComp's Products & Services

REALITY TWIN™

3D Digital twin environment

SolidComp Reality Twin is an up-to-date and true-to-life 3D model of your production facility, bridging the gap between physical and digital reality.

Reality Twin is a Software as a Service –solution that's delivered as a comprehensive solution, often including laser scanning of the production area and integration with existing data.

**Put your data to work
and reduce design costs
and site visits by 5–10%**

Your Trusted Partner

SolidComp is a full-service provider of high-quality 3D scanning solutions for industrial needs across the Nordic countries, and through our partner network, worldwide.

Our flagship product, Reality Twin™, is an exceptionally visual and precise digital twin, delivering an accurate virtual replica of industrial environments. We offer solutions for production plants, engineering firms and equipment manufacturers, enabling them to work more efficiently, safely, and with greater confidence.

DESIGN AND INVESTMENTS

Base your planning and funding decisions on precise data in an easily communicable visual format.

CONSTRUCTION AND INSTALLATIONS

Seamless project execution with clear visual references and easy user management with unlimited users.

OPERATIONS AND MAINTENANCE

Streamline daily work, prevent downtime and manage life-cycle optimisation.

SAFETY AND TRAINING

Minimise site visits and provide risk-free 3D environments for instruction and drills.
